

I wanted to follow up on [my earlier education poll](#) and share the results with you. While the results are not

The results were as follows:

The proper role of the federal government in education policy is to:

- | | |
|------------|---|
| _____ | A. Establish a national test measuring education achievement, enhance accountability, and |
| 13% | |
| | B. Maintain the current policy of partially funding education initiatives and supplementing state and local |
| 10% | |
| | C. Leave decisions about education and funding for programs exclusively to local education agencies and |
| 57% | |
| | D. Other (Please use the link after submitting the poll to share your thoughts) |
| 20% | |

Those who selected the "other" option supported some of the reform ideas such as increased accountability

As a former school board member, I know that providing a first-rate education for America's children is critical

I appreciate the input of everyone who took the time to participate in the poll or write to me about education
